

Madhur Maheshwari

Digital Transformation and Business Analytics

Jaipur, India | +91 63670 36294 | madhurmaheshwari10@gmail.com

[Portfolio](#) | [LinkedIn](#) | [GitHub Projects](#)

Professional Profile

Digital transformation and analytics professional who built operations applications and AppSheet workflows and co-developed commodity forecasting, farmland assessment and IPO research tools. Combined Python and SQL analysis with workflow automation, source verification and implementation handover.

Experience

Digital Transformation Lead

Jul 2026 - Present

Jai Hasti Infra LLP | Jaipur, India

- **Facilities Operations Platform.** Built React and TypeScript staff and management apps for schedules, requests, readings and approvals, with role-based access, traceable actions and recovery after connection loss.
- **AppSheet Operations System.** Designed and deployed 10 connected tables with scheduled tasks, approval flows, reminders and notifications.
- **Rollout and handover.** Created an 80-page implementation guide and a launch plan covering workflow and staff testing, backups, support and recovery.

Intern

May 2023 - Jul 2023

RC Plasto | Nagpur, India

- **Process analysis.** Reviewed production, logistics and sales; reported three areas for potential improvement.

Technical Capabilities

Analytics: Python, SQL/MySQL, R, LightGBM, XGBoost; data cleaning, feature engineering and backtesting

Applications: AppSheet, React, TypeScript, JavaScript, Next.js, Node.js; workflow automation and access controls

Research and reporting: Document extraction, source verification, geospatial analysis; Excel, Power BI, Tableau

Delivery: Responsive interfaces, workflow testing, rollout plans, handover documentation, Git and GitHub

Education

Master's in Business Analytics and Data Science

Jun 2026

EU Business School | Barcelona, Spain

Bachelor of Business Administration

Jul 2021 - Jun 2024

Data Analytics specialization | Christ University | Bengaluru, India

Portfolio Projects

Madhur Maheshwari | Project details: gabreo10.github.io/portfolio

Rice Paddy, Land Project and IPO Dossier were co-developed with a project partner.

Rice Paddy Price Prediction

Python, LightGBM, XGBoost | Forecasting and model evaluation

- **Forecasting study:** Audited 174,556 public AGMARKNET records for targets one to three calendar months ahead. Compared 19 methods on 1,308 held-out cases; the validation-selected model did not establish dependable improvement over simple baselines.
- **Evidence controls:** Built contextual features using only reviewed information available at the forecast origin, with a separate source trail. Released the feature module with 14 passing original tests and aggregate error results.

Land Project

Geospatial analysis | Soil, weather and satellite data

- **Farmland assessment:** Combined field boundaries, nearby government soil tests, 35 years of weather history, satellite observations and mapped water sources into a report.
- **Decision rules:** Screened 180 Indian crops through five rule-based checks. Distinguished tested values, estimates and unchecked data; AI explained verdicts without changing them.

IPO Dossier

Python | Document extraction and research reports

- **Document analysis:** Co-developed an IPO research tool with a Python prospectus reader, covering 45 offer documents with source-page citations and two-page decision briefs.
- **Source validation:** Checked AI-extracted figures against exact quotes on the cited PDF page before retaining them. Added subscription and anchor-investor context.

Additional Projects

- **Responsive websites:** Created property and plant-retail website concepts: a property enquiry journey, a plant catalogue, and separate retail and wholesale enquiry paths.
- **US Debt Tracker:** Built an interactive Excel dashboard with pivot tables and charts.
- **Income and Life Expectancy:** Cleaned and explored separate MySQL datasets using joins, grouped summaries and trend queries.
- **Football Ticket Intelligence:** Developed a Python ticket-price prediction model from historical match data (Dec 2023 - Apr 2024).

Leadership and Qualifications

Logistics Head: MirAi Data Analytics Club, Christ University (2023 - 2024). Managed event planning, vendor coordination and workshop logistics.

Certifications: MySQL for Data Analytics; Excel for Data Analytics; Introduction to Football Analytics; Analyzing Football Using Video; Leadership and Team Effectiveness

Languages: English, Hindi, Spanish (A2)
